DETAILED ACTION

1. In view of the amendment, previous 102(a) rejection on claims 27 and 34 over Hanabata et al (WO'131), previous 103(a) rejection on claims 27 and 34 over Meier et al'233, previous 103(a) rejection on claims 21 and 223 over Aoso (JP'193), previous 103(a) rejection on claim 19 over Aoso (JP'193) in view of Niinomi et al (proceedings of SPIE), previous 103(a) rejection on claim 20 over Aoso (JP'193) in view of Niinomi et al and Zhong et al'965 and previous 103(a) rejection on claims 25, 26, 29, 32 and 33 over Ueda (JP'545) are hereby withdrawn.

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Claim Rejections - 35 USC § 102

Claim Rejections - 35 USC § 103

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

5. Claim 29 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Ueda et al (JP 10-239843, its JPO English abstract and its machine-assisted English translation provided by JPO).

Ueda teaches a negative photosensitive composition containing a cyclic polyphenol compound of formula I, a photoacid generator and a crosslinking agent. (see JPO English abstract). Ueda also teaches the use of an organic solvent to dissolve the components of his photosensitive composition (see [0034]).

As one of examples for the cyclic polyphenol compound of formula I, Ueda teaches (see [0009]-[0010]) the following:

. One skilled in the art would immediately envisage using the compound (2) in Ueda's composition. Or, alternatively, it would

have been obvious to one skilled in the art to use the compound (2) in Ueda's composition with a reasonable expectation of obtaining a photosensitive composition superior in sensitivity and resolution. The compound (2) teaches present compound of formula (1) of claim 29; present X, Y and Z are ether bonds and present B, C and D are all H atoms. Since the composition does not contain a polymer, Ueda teaches or renders obvious present invention of claim 29.

Allowable Subject Matter

6. Claims 1-17, 19-28 and 30-35 are allowed. Ueda (JP'843) does not teach or suggest present inventions of claims 1, 5, 21, 22 and 24-28.
